

Mur-Lok® Flexible PVC Tubing

Mur-lok® Flexible PVC Tubing is designed for low pressure applications, including water softener drain line. The 1/8" wall thickness provides excellent resistance to kinking and cracking. The black tubing has inherently good UV resistance and can be used for outdoor installations.

Tubing Specifications	
Wall Thickness	1/8"
Working Pressure	40 PSI @ 70° F
Maximum Operating Temperature	170° F
Brittle Temperature	20°F
Shore Hardness	80 A

Made in the USA

Tube OD	Tube ID	Length	Color	Part Number
3/4"	1/2"	150' Coil	Black*	L1201506
			Clear	L1201507
7/8"	5/8"	100' Coil	Black*	L1401006
			Clear	L1401007

* Black tubing is UV resistant

Applications

- Water & Fluid Lines
- Air & Gas Lines
- Chemical Lines
- Pharmaceutical
- Food & Beverage
- Instrumentation
- Laboratory & Research
- Material Handling
- Medical
- Protective Jacketing
- Pump Feed & Discharge
- Refrigeration

Note: Please contact customer support for information on using Mur-lok® PVC tubing with chemicals or aggressive liquids.
